

Positive Displacement Meter

The SATAM Positive Displacement Meter (PD meter) is a system with freely-moving blades used to measure petroleum products such as fuels, bio-fuels and refined liquid hydrocarbons.

Its simple design with only two pairs of blades and one moving rotor makes it exceptionally robust and allows the user to make significant savings on maintenance costs.

1. Sectors of application

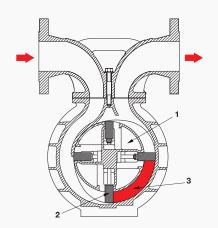

- Oil depots
 For oil product reception and loading stations for trucks
- Hydrocarbon transportation
 Distribution of fuel oil or fuel by road tanker
- Aircraft refuelling
 Aircraft dispensers and aircraft fuelling tankers
- Army
 Depot supplies and loading of trucks
- Transport companies
 Refuelling of locomotives, trucks and public transport coaches
- Marine applications
 Refuelling of ships
- Mining sites
 Refuelling of trucks or site machinery

2. Operating principle

The product enters the measuring chamber following the direction of the arrow. The rotor and blades assembly (1-2) is set in motion by the pressure of the liquid on blades. A certain amount of liquid (3) is held between 2 blades and then directed to the discharge manifold. The volume of liquid measured at each rotation is therefore equal to 4 times the measured quantity (3). The smooth curves the meter pieces provide a steady, non-fluctuating flow resulting in low head loss.

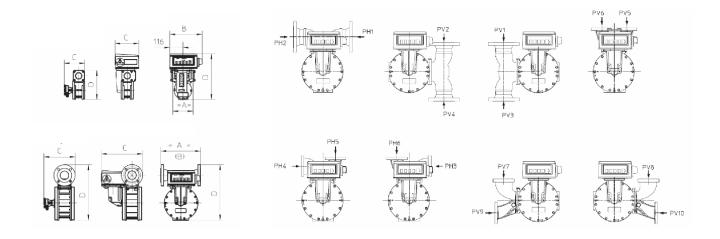

3. Key points

- Reduced pressure loss
 0.3 to 0.5 bar at maximum flow rate
- Low maintenance costs
 Simple and robust design with mechanical components interchangeable between the different models
- Stability of measurements
 Accuracy of measurement guaranteed over a period of many years without any drift in the calibration curve
- Modular design
 Wide range of accessories for performing customized measurement applications
- Robust construction
 Flowmeter manifold is separated from measurement chamber to eliminate any possible influence of external mechanical stresses on measurement.
 Few moving parts.

Technical data

			l					
Model		ZC17 12	ZC17 24	ZC17 48	ZC17 80	ZC17 150	ZC17 250	ZC17 330
Max. Flowrate	(m3/h /LPM/USGPM)	12/200/53	24/400/105	48/800/210	80/1333/360	150/2500/660	250/4166/1100	330/5500/145
